Information Systems graduate from Gunadarma University with experience in System Analyst and Manual QA Testing. Skilled in requirements analysis, business process modeling, wireframing, prototyping, and software testing. Seeking a career as a System Analyst, UI/UX Designer, or QA Tester.

WORK EXPERIENCE

Kementerian Keuangan, Jakarta Dec 2025 – Present
System Analyst – Intern

- Developed 3+ Business Requirement Documents (BRDs) for internal web applications to support system development and business process improvement.
- Created system models using BPMN, use case diagrams, activity diagrams, and feature diagrams.
- Designed 30+ high-fidelity mockups and interactive prototypes in Figma based on business and user requirements.
- Collaborated with stakeholders and development teams to gather requirements and support system planning.

Otoritas Jasa Keuangan, Jakarta Jul 2025 – Aug 2025
Manual Quality Assurance Tester - Intern

- Executed manual testing on 5+ web and desktop applications to identify bugs and ensure system quality.
- Participated in System Integration Testing (SIT) to ensure seamless interaction across modules.
- Identified and reported 30+ bugs using OJK Internal documentation platform, collaborating with developers and UX teams to enhance quality.
- Documented test result and progress using Microsoft Word and Google Sheets.

Information Systems Laboratory, Gunadarma University Sep 2023 - Jan 2025
Laboratory Assistant

- Developed database practicum learning concepts to support the 2024/2025 academic year.
- Guided 80+ students during weekly 2-hour practicum sessions.
- Managed and documented student grades through detailed weekly Excel reports.

EDUCATION

Gunadarma University - Bachelor of Information Systems Sep 2021 – Aug 2025

- **GPA:** 3.89 / 4.00
- **Final Project:** “Application Of Data Mining In Clustering Sales Patterns At Patented Pharmacies Using The K-Means Algorithm” and “Development of a Web-Based Drug Inventory Information Application for Patented Pharmacies Using Golang, React.Js, and PostgreSQL”

Ruang Guru x MSIB – Backend Engineering Feb 2024 - Jun 2024

- **Relevant Course:** Golang, Git, PostgreSQL, Postman, Machine Learning, and Agile Methodology.

PROJECT EXPERIENCE

Application Of Data Mining In Clustering Sales Patterns Apr 2025 – Aug 2025

- Analyzed pharmacy sales and applied K-Means to cluster products by quantity and revenue.
- Built Python model and interactive dashboards to visualize sales pattern – [Link](#).
- Improved inventory planning accuracy by 60%, reducing overstock and optimizing stock efficiency.

Teacher Management Website Project - SDIT Al-Muzzammil Sep 2024 - Jan 2025

- Developed a teacher management website using PHP and MySQL.
- Collaborated in a 5-member team throughout the development cycle.
- Improved data management efficiency by 60% through automated processing, reducing manual errors and accelerating information access.

Web-Based Drug Inventory Information Application - Patent Pharmacy Apr 2024 - Jul 2024

- Developed a web-based drug inventory system to resolve stock recording inaccuracies.
- Built with Golang, PostgreSQL, and React.js, maintaining efficient development via Git version control.
- Achieved 70% inventory accuracy improvement by developing an information system – [Link](#).

SKILLS & CERTIFICATIONS

Languages: Bahasa Indonesia (Native) and English (Basic – Reading & Writing)
Technologies: Figma, Draw.io, SQL, HTML, CSS, JavaScript, Canva, Golang, Microsoft 365 (Word, Excel, PowerPoint), and Google Workspace (Sheets, Docs, Slides).

Soft Skills: Analytical thinking, Problem Solving, Attention to Detail, Time Management, Communication, and Teamwork.

Certification: System Analyst on BNSP (2025), Software Testing on Udemy (2025), Design Software (2025), Analyzing Software Requirements (2024), Oracle For Intermediate (2024). [– Link.](#)
