Recent Information Systems graduate from Gunadarma University with experience in System Analyst and Manual QA Testing. Skilled in Figma, PHP, React.js, SQL, and Excel, with strong attention to detail and teamwork skills. Seeking a career as a System Analyst, UI/UX Designer, or QA Tester.

WORK EXPERIENCE

Kementerian Keuangan, Jakarta

Dec 2025 – Present

System Analyst – Intern

- Developed Business Requirement Documents (BRD) for internal web applications to support system development and business process improvement.
- Gathered and analyzed user requirements to support business process improvement initiatives.
- Designed UI/UX wireframes and dashboards aligned with user and organizational needs.
- Collaborated with stakeholders and development teams during requirement analysis and system planning.

Otoritas Jasa Keuangan, Jakarta

Jul 2025 – Aug 2025

Manual Quality Assurance Tester - Intern

- Executed manual testing on 5+ web and desktop applications to identify bugs and ensure system quality.
- Participated in System Integration Testing (SIT) to ensure seamless interaction across modules.
- Identified and reported 30+ bugs using OJK Internal documentation platform, collaborating with developers and UX teams to enhance quality.
- Documented test result and progress using Microsoft Word and Google Sheets.

Information Systems Laboratory, Gunadarma University

Sep 2023 - Jan 2025

Laboratory Assistant

- Developed database practicum learning concepts to support the 2024/2025 academic year.
- Guided 80+ students during weekly 2-hour practicum sessions.
- Managed and documented student grades through detailed weekly Excel reports.

EDUCATION

Gunadarma University - Bachelor of Information Systems

Sep 2021 – Aug 2025

- GPA:** 3.89 / 4.00
- Final Project:** “Application Of Data Mining In Clustering Sales Patterns At Patented Pharmacies Using The K-Means Algorithm” and “Development of a Web-Based Drug Inventory Information Application for Patented Pharmacies Using Golang, React.Js, and PostgreSQL”

Ruang Guru x MSIB – Backend Engineering

Feb 2024 - Jun 2024

- Relevant Course:** Golang, Git, PostgreSQL, Postman, Machine Learning, and Agile Methodology.

PROJECT EXPERIENCE

Application Of Data Mining In Clustering Sales Patterns

Apr 2025 – Aug 2025

- Analyzed pharmacy sales and applied K-Means to cluster products by quantity and revenue.
- Built Python model and interactive dashboards to visualize sales pattern – [Link](#).
- Improved inventory planning accuracy by 60%, reducing overstock and optimizing stock efficiency.

Teacher Management Website Project - SDIT Al-Muzzammil

Sep 2024 - Jan 2025

- Developed a teacher management website using PHP and MySQL.
- Collaborated in a 5-member team throughout the development cycle.
- Improved data management efficiency by 60% through automated processing, reducing manual errors and accelerating information access.

Web-Based Drug Inventory Information Application - Patent Pharmacy

Apr 2024 - Jul 2024

- Developed a web-based drug inventory system to resolve stock recording inaccuracies.
- Built with Golang, PostgreSQL, and React.js, maintaining efficient development via Git version control.
- Achieved 70% inventory accuracy improvement by developing an information system – [Link](#).

SKILLS & CERTIFICATIONS

Languages: Bahasa Indonesia (Native) and English (Basic – Reading & Writing)

Technologies: Figma, Draw.io, HTML, CSS, JavaScript, SQL, Golang, React.Js, PHP, Canva, Microsoft 365 (Word, Excel, PowerPoint), and Google Workspace (Sheets, Docs, Slides).

Soft Skills: Analytical thinking, Problem Solving, Attention to Detail, Time Management, Communication, and Teamwork.

Certification: System Analyst on BNSP (2025), Software Testing on Udemy (2025), Design Software (2025), Analyzing Software Requirements (2024), Oracle For Intermediate (2024). – [Link](#).
